

Overview

Vision is a dataset built from your own workforce data, along with thousands of global suppliers' integral performance statistics – bringing true visibility, enhancing partnerships, and guiding you to make better, data-led business decisions.

Make data-driven decisions

Supplier Vision

Displaying performance data, it allows suppliers to benchmark their performance on client programs and within the market. It also shows clients anonymized data on how suppliers are performing elsewhere.

Workforce Vision

Analyze, identify, and improve talent quality. Discover new performance opportunities through exhaustive visibility of contingent and SOW/Services Procurement workforces.

A powerful, personalized data ecosystem

Interactive reporting

Analyze, drill down and manipulate past and present data, in real time.

Performance monitoring

Review metrics vs targets to benchmark performance and measure program health.

Root cause analysis

Get down into the nitty gritty data to identify causes and trends.

Key performance influencers

Discover which metrics influence individual supplier performance with more transparency.

Program benchmarking

Compare metric performance vs other suppliers and anonymized workforce programs.

Question and learn

Boost insights using context-dependent keywords to run Q&A data searches and display results your way.
